## PROFESSIONAL PROFILE

Software Programming Technician, currently training to become a Software Analysis and Development Technologist. I specialize in web development, covering both front-end design and the secure and efficient implementation of back-end systems. I have experience in developing well-structured and documented APIs, as well as mobile development and DevOps, optimizing the software lifecycle. I work collaboratively using Git and agile methodologies, ensuring organized and efficient development. I am always driven by a proactive attitude that pushes me to improve and learn more in this field.

---

## ACADEMIC BACKGROUND

Software Programming Technician  
SENA | February 2022 – December 2023

Software Analysis and Development Technologist  
SENA | January 2024 – December 2025

---

## ADDITIONAL TRAINING

Web Programming Specialization  
Netzun

Advanced Docker  
Platzi

Intermediate REST API  
Hacker Rank

SQL Specialization  
Netzun

Advanced Next.js  
Platzi

SQL Advanced  
Hacker Rank

Git and GitHub  
Netzun

PHP Databases  
Platzi

Web Development with PHP  
SENA

Advanced SQL  
Netzun

Introduction to DevOps  
Platzi

Database Construction with  
MySQL  
SENA

Advanced JavaScript  
Netzun

Front-End Developer  
Hacker Rank

Python Programming Language  
U Distrital

---

## ACHIEVEMENTS

One of my greatest achievements in development was **participating in a project for SENNOVA** as a monitor, where I was responsible for **creating an accessibility tool for WCAG documentation**, as well as planning and developing the WCAG documentation itself. Additionally, I have had the honor of **leading the most outstanding projects** in both my technician training and my current Technologist program, demonstrating leadership skills and effective execution of technological solutions.

---

## TECHNICAL SKILL

**Front-end Development:** HTML, CSS (Tailwind, Bootstrap), JavaScript (React, Next.js, jQuery)

**Back-end Development:** Node.js (Express, Sequelize), PHP (Laravel)

**Databases:** MySQL, PostgreSQL, Advanced SQL, NoSQL (MongoDB)

**APIs:** Design, development, and documentation of REST APIs

**DevOps:** Docker, CI/CD, cloud deployment

**Version Control:** GitHub (Semantic Git, GitFlow)

**Mobile Development:** React Native
